

for your cost-effective metal fabricating equipment

to cut flat sheet metal Masteel offers two solutions:

swing beam shears (from 8' length ¼" mild steel capacity to 12' length ¼" mild steel capacity) and guillotine shears (for heavier gauge material) to straight shear flat sheet metal

fiber laser centres to process from 3 x 1.5m to 12 x 2.5m sheet size and from 2kw to 12kW laser power capacity to cut any flat sheet metal shape (*with optional tube laser cutting section**)

**showing the optional tube laser cutting section with the standard safety guarding enclosure and pallet changer removed to illustrate the cutting area lay-out*
