

CNC considered for Masteel supplied turning/machining/boring+milling centres

first choice / highest sales level

last choice / lowest sales level

Fanuc

very reliable performance
most widely used / preferred
best local service support

Mitsubishi

best performance
high reliability
most efficient for Swiss turning centres

Heidenhain

most powerful 5-axis performance
most popular 5-axis control

Siemens

very easy/powerful conversational programming
open architecture
high power drive motors
best digital twinning technology
excellent on-line service
no local service support

Fagor

easy conversational programming
poor performance / poor reliability
too many intermittent issues
premature component failures
poor metalworking application knowledge
slow service request information response
